

INFORMATION SECURITY POLICY

Kalekalıp Makina Ve Kalıp San. Inc. Management; It considers corporate information as an extremely valuable asset and acts with the principle of "Information Protection" in its activities. It aims to establish, operate and continuously improve the ISO/IEC 27001 Information Security Management System Standard in line with the targets.

To ensure this;

- To value and protect information,
- To fulfill our information security obligations arising from legal regulations regarding our activities or our agreements with third parties,
- To protect the confidentiality, integrity and accessibility of our information assets,
- To raise awareness of our employees and third parties about information security and to increase their awareness to protect their and their stakeholders' information,
- To ensure that the basic and supporting business activities of our institution continue with minimal interruption
- To ensure that our information is secured by effectively managing our information security risks,
- Determining information security roles and responsibilities and providing the necessary resources

We commit.
